

Product data sheet

Intensive cleaner

Item no. 1101 0992

Product features

- Aqueous cleaning agent for severely soiled oiled parquet
- For removing care product layers (aqueous polish) and difficult-to-clean dirt on lacquered parquet

Working with the product

- Protect surfaces adjoining the parquet surface from the effects of Intensive Cleaner
- Do not apply too much moisture to prevent the wood from swelling or discolouring.
- Spray pure Intensive Cleaner and distribute it evenly, letting it set for a short time
- Then mop it up with an absorbent cloth or sponge
- Wipe the parquet surface treated with Intensive Cleaner again with water, to make it slightly damp, and let it dry

A single-disk machine with a cleaning pad is better for treating larger surfaces. Optimally, such larger areas should be handled by two people, working section-by-section. In doing so, one person removes the layer of care product loosened by the machine before the care product dries again.

Storage

- May be stored for at least 1 year in well-sealed original packaging
- Protect from frost
- Keep away from children
- Do not store at temperatures under 5 °C

Water hazard class: Generally not water-hazardous

Waste code: 08 01 16
